> summary

Applied AI Engineer with 13+ years of software engineering, now building autonomous software factories — multi-agent systems that take a requirement and ship a reviewed pull request end-to-end, running 24×7 on local and AWS EC2. I integrate LLMs through the Model Context Protocol (MCP) and reusable Claude Skills, on a deep foundation of Java 17, Spring Boot, NestJS, microservices, AWS and Kubernetes — delivered across renewable energy, smart metering, logistics and real estate.

Applied AI Engineer

Vaisala · Finland · 2026 – Now

Vaisala Oyj

- ▶ Build **autonomous software factories** — multi-agent AI systems that ship code, tests, deployment and maintenance end-to-end, running 24×7 locally and on AWS EC2.
- ▶ Architected a multi-agent setup for a microservices platform where agents coordinate, communicate and orchestrate services to improve reliability.
- ▶ Integrate LLMs via the Model Context Protocol (MCP) and reusable Claude Skills for grounded tooling and context.
- ▶ Built a free AI code-review assistant for Bitbucket Server, driven by a single markdown file, producing automated inline PR comments.

Senior Software Developer

Vaisala · Finland · 2023 – 2026

Vaisala Oyj

- ▶ Designed secure, high-performance Java 17 / Spring Boot and NestJS microservices for renewable-energy SaaS on AWS and Kubernetes.
- ▶ Drove code quality via automated testing, code reviews and CI/CD; implemented security with Spring Security and Keycloak.
- ▶ Mentored developers and collaborated with cross-functional teams and non-technical stakeholders.

Sr Software Designer / Software Designer / Sr Engineer

Landis+Gyr · FI & IN · 2018 – 2023

Landis+Gyr Oy

- ▶ Scrum Master in a SAFe Agile framework — stand-ups, PI planning (ADO, Stormboard) and team alignment.
- ▶ Full-SDLC delivery on smart-metering platforms: design, development, testing and maintenance in a TDD environment.
- ▶ Led code reviews, technical documentation and developer mentoring.

Senior Software Engineer / Software Engineer

ARX Analytics · India · 2016 – 2018

Arx Tech-AXS Pvt. Ltd.

- ▶ Technical architect — high/low-level architecture, technology integration, workflow definition and security layers.
- ▶ Led teams, defined technical tasks and translated business requirements into solutions.

Iipseity Group

- Full-SDLC delivery — analysis, design, development, testing and deployment of enterprise Java applications.
- Built UI components and business logic, integrated multiple frameworks and resolved production issues.
